

Compact Design Folds Into A Tight Package – Minimal Space Required To Store Onboard Trucks And Hazmat Response Vehicles

- Compact, lightweight, portable design — no inflation required.
- Protect heavy equipment from spills during filling, discharging, cleaning and maintenance.
- Smaller sizes provide total containment of drums, tanks, generators, compressors and other equipment prone to leaks and spills.
- Sidewalls lower quickly to allow drive in/drive out.

STEP 1: Unfold onto the desired location...
(note: 12' x 60' x 1' pictured)

STEP 2: Insert the sidewall struts into their pockets.
Compact Berms are ready to go!

Custom Sizes Available!

Standard material of construction is Copolymer 2000™.
