

Portable Secondary Containment For Drums, Tanks, Equipment And Vehicles

Stake Wall Model Containment Berms feature a unique design that allows the sidewalls to collapse in either direction and spring back automatically to their upright position! Roll drums over the sidewalls, drive trucks through them, and the sidewalls always return to vertical without assistance.

Perfect for containment of drums in remote areas. 10' x 10' Containment Berm holds up to 16 drums.

Containment Berms deploy in only seconds, no assembly required... excellent for off-site containment of generators, transformers, fuel tanks, vehicles, etc.

Sidewalls collapse, offering convenient loading/unloading on remote locations.

Vertical sidewall supports feature a two way "living-hinge."

- Does not rely on inflation, hinged straps or cumbersome frames to keep sidewalls up.
- No set-up required — unfold and the sidewalls automatically spring into their vertical position.
- Helps comply with federal and local stormwater regulations.
- Custom sizes available.

Meet EPA and Uniform Fire Code Spill Containment Regulations with portable Ultra-Containment Berms.

ULTRA-CONTAINMENT BERMS, STAKE WALL MODEL

Dimensions	4' x 6' x 1'	6' x 6' x 1'	10' x 10' x 1'	15' x 50' x 1'	15' x 66' x 1'
Part#	8308	8309	8310	8337	8332
Weight	44 lbs.	50 lbs.	100 lbs.	438 lbs.	563 lbs.
Containment Capacity	179 gallons	269 gallons	748 gallons	5,610 gallons	7,405 gallons
