

## Low Profile, "In Line" Designs Save Valuable Floor Space And Comply With Spill Containment Regulations

5-Drum InLine SpillDeck Part #2333, with optional loading ramp.

InLine Models are pre-drilled and can be quickly assembled without tools. The bulkhead fittings "lock" connected modules together and allow spills to flow from one module to the next.

4-Drum InLine SpillDeck Part #2361 with Ultra-DrumRack P1 Part# 9030.

- Standard InLine Models include 3-drum, 4-drum, 5-drum and 6-drum configurations.
- Narrow 25 7/8" depth allows drums to be stored in a single row along facility walls — minimizes space requirements.
- Low profile design reduces safety and handling concerns found with taller containment pallets.
- Additional SpillDeck modules can be easily connected to an existing InLine configuration — allows more drums to be added to your containment area as storage needs grow.
- All models meet EPA Container Storage Regulation 40 CFR 264.175 and Uniform Fire Code Spill Containment Regulations.

3-, 4- and 5-Drum Units utilize a hidden containment bladder for additional sump capacity to meet EPA and UFC Spill Containment Regulations.
